

SHIVENDER SINGH

Mobile: 9545285209/9325683737*E-Mail: shivender339@gmail.com/ shivendersinghlucky@gmail.com

Looking for an innovative and challenging software environment, which can fully utilize my capabilities and to be dynamic software professional working systematically, building good logic to be globally competitive following the perfect principle of time and quality techniques.

AN OVERVIEW

- Having 9+ years of experience in Software Testing Industry as a QA Engineer in Automation and Manual Testing
- Experience in UI Automation with Selenium Webdriver
- Experience in TestNG, Cucumber(BDD)Framework, POM, Keyword driven
- Experience with Github repository for the version control system
- Experience with the Excel and JIRA tool for Manual Test case Management & Defect Reporting.
- Working experience in the AGILE SDLC process
- Having good knowledge of Core Java and python.
- Having good knowledge of Jenkins continuous integration tool
- Having Strong knowledge of STLC and Defect Tracking Lifecycle
- Proficient in a wide range of testing (Functional, Regression, Exploratory, Integration, System, Browser Compatibility, Ad-hoc / random, Mobile testing).
- Having good knowledge of SQL queries and MySQL Database.
- Worked across several projects with different domain(Bfsi, Automobile, Healthcare)
- Strong communication & interaction with Clients (Using Emails, Skype, calls), Developers & Management.
- Training new employees and helping them to understand the workflow.
- Quick learner, adaptable and flexible to the ever-changing technology and confident.
- Experience implementing RAG-based
- Designed and executed test strategies for AI agentic systems.
- Utilized MCP tools (selenium, playwright)

SKILL SET

Vertical Industry	Automobile Services
Primary Programming Languages	Java,python
Frameworks	POM(Page Object Model), Keyword driven and BDD based framework, TestNG
Application/Web Servers	Apache Tomcat, Websphere, Liberty
Database	SQL Server, DBeaver
Operating System	Windows XP/7/8/10, Linux
Web Technologies	HTML,CSS
IDEs	Spring Tool Suite, Eclipse
Defect Tracking Tools	Jira, Jrac, Bugzilla
Documentation Tools:	Confluence, MS Office
Other Tools and Technologies	Docker, Zalenium,Selenoid, Allure for reporting,Git,SVN,CI/CD pipeline, RAG,MCP,AI agen

ORGANIZATIONAL SCAN

Test specialist in Tsys(July 2021 – Till date)

Associate consultant in Capgemini (September 2018 – July 2021)

QA in BNT-SOFT (December 2017 – September 2018)

Test Engineer in Mograsysspvt ltd (September 2017 – DEC 2017)

Software associate in Agilatest Technologies pvt ltd. (June 2016 – September 2017)

PROJECT OVERVIEW

Title #1: Manual with Automation (TSYS)

Technologies: Selenium, Java,SQL,python, RAG,Agentic AI, TestNG, JIRA,cucumber,Eclipse,Git ,Docker,seleniuim grid, Banking application on Client Web over vmware,RDP : client web application on web

Description: Global payments banking application is used to provide payment technology like (POS) and services to different merchants, issuers and consumers as per there different region (Canada, US, AP)

Role: Senior Test Analyst

Responsibilities:

- Requirement gathering and estimation
- Involve in and develop test plans and Design functional test cases from business requirements specification.
- Work with the entire stakeholders to define the Test strategy program of every sprint and manage all type of changes together with the team.
- Coordinate and support integration, end-to-end testing with peer Test Engineering groups to ensure seamless code releases.
- Ensure delivery of a high quality product meeting all requirements within the scheduled time frame
- Involve in retrospective meetings with stakeholders at the completion of the project deployment.
- Involved in following deliverable Test case design, Query tracker, Requirement traceability matrix, RCA.
- Develop modular automated test scripts utilizing reusable functions, data-driven techniques and perform basic management of automation libraries.
- Work closely with Test Engineering team members across geographies to help them comprehend, define, develop, maintain and execute automated test scripts and tools.
- Prepared test scripts from scratch as per the requirement in Selenium WebDriver using TestNG/Cucumber.
- Automate the Regression suite with Selenium WebDriver using TestNG/Cucumber.
- Examined Test logs and investigated any bugs found during test scripts runs.
- Produced the summary reports and status reports.
- Building automation frameworks and utilities, writing Automation Scripts
- Experience in Rest Api testing using rest clients.
- Work For TET(Test enablement Team) Team for developing the utility for the framework basis.
- Performed ETL-based testing using Informatica/SQL to validate data integrity, transformation logic, and end-to-end pipeline accuracy between source and target systems.
- Developed Python-based test utilities and data validation scripts to automate repetitive testing tasks and enhance test coverage.
- Experience implementing RAG-based models for intelligent test data generation and dynamic test case prioritization
- Designed and executed test strategies for AI agentic systems, validating autonomous decision-making capabilities and user interaction flows
- Developed automated test frameworks integrating LLM-based validation for natural language processing components
- Utilized MCP tools to optimize test coverage and resource allocation across complex testing environments
- Created user-centric test scenarios for AI agents, ensuring seamless human-AI interaction and appropriate response handling
- Experience with prompt engineering and testing LLM-based applications for accuracy, bias, and edge case handling

Title #2: Manual with Automation (Capgemini)

Technologies: Selenium, Java, TestNG, JIRA, cucumber, Eclipse, Git/SVN, Docker, selenium grid, zelanium
PSA(Automobile) on Client Web over citrix : client web application on web

Description: PSA application is used for automobile maintenance/purchasing purpose where an application will provide the service from booking an appointment for automobile till its delivery.

Role: SDET

Responsibilities:

- Involved in the requirement gathering for automating the test scripts.
- Executing the Test Cases and drafting Test Requirements manually.
- Involved in a wide range of testing (Functional, Regression, Exploratory, Integration, System, Browser Compatibility, Ad-hoc / random, Sanity).
- Prepared test scripts in Selenium WebDriver using TestNG.
- Formulated and executed the test scripts as per the requirements or design document.
- Examined Test logs and investigated any bugs found during test scripts runs.
- Reporting the bugs using Bugzilla and JIRA.
- Produced the summary reports and status reports.

Certification and Trainings

- ISTQB certification 2025
- Completed training of Manual Testing with Selenium Web driver.
- ITB (Indian testing board) in May 2015.
- IBM Certified Java under Career Education Program
- Associate cloud engineering certification 2021

ACADEMIC CREDENTIALS

- 2016 Bachelors of Engineering - Computer Science, Maharashtra Pune University. Secured 55%.
- 2011 Intermediate - Computer Science, Kendriya Vidyalaya, CBSE Board. Secured 56%.
- 2009 High School, Kendriya Vidyalaya, CBSE Board. Secured 64%.

PERSONAL DOSSIER

Date of Birth: 01 Nov, 1993

Residential Address: B-03 staff quarter MIT Vishwashanti Gurukul Ioni kalbhor 412201
